

HEAT PUMPS

LOW OPERATING COSTS

EASY AND FAST INSTALLATION

COMPLETE RANGE OF HEAT PUMPS FOR ALL YOUR POOL HEATING NEEDS

MULTI AWARD WINNERS

Your pool heating Partner

DESIGNED & BUILT SPECIFICALLY FOR THE AUSTRALIAN MARKET

- ✓ Each & every OASIS heat pump is factory tested prior to final packaging
- ✓ Best Technical sales support & design in Australia
- ✓ Installation service available by qualified technicians in all major cities
- ✓ Product warranty backed by 25 years of industry experience
- ✓ Spare parts and after sales service available in all major cities
- ✓ Product satisfaction & reliability guaranteed
- ✓ Whisper quiet fan design

ELITE ALLOY SERIES

The OASIS Elite Alloy is latest in heat pump technology and with its new cutting edge design is the popular unit in our range.

This range of Heat Pumps are built in a tough, lightweight, rust proof Aluminium Casing making this unit the most aesthetically appealing Heat Pump on the market. The Elite Alloy range is available in 9kW, 14kw & 18kw options for both extended season and all year round heating. The units are manufactured with the same components and quality control as the existing OASIS range ensuring the same reliability and energy efficiency our clients expect.

SPECIFICATIONS

	Model	Heating Capacity (Kw)	Cooling Capacity (Kw)	Power Supply (V)
Extended Season & All Year Heating <small>*AC9 / C10 units are powered by a standard 240V power point connection and come with 240V 3 pin plug as standard.</small>	OASIS AC9*	9	6	240
	OASIS AC14	13.2	8	240
	OASIS AC18	18.2	10.5	240
Oasis C Series Heating & Cooling, All Year Heating with Auto Defrost	OASIS C10*	10	5.4	240
	OASIS C16	16	7.4	240
	OASIS C21	21	13	240
	OASIS C25	25	15.5	240
	OASIS C25T	25	15.5	415
	OASIS C38T	38	24	415
	OASIS C47T	47	32	415
	OASIS C58T	58	45	415
Oasis C Series Commercial Range Heating & Cooling with Auto Defrost	OASIS C95	95	70	380V/3/50Hz
	OASIS C120	120	94	380V/3/50Hz
	OASIS C145	145	96	380V/3/50Hz
	OASIS C200	200	119	380V/3/50Hz

COMPONENT BENEFITS

- World class sophisticated yet easy to use Oasis LCD controller
- Hydrophilic fin coil coating
- Powder coated steel cabinets
- Titanium coil (lifetime warranty)
- Fan Design (whisper quiet)
- Reverse cycle defrost
- Internal flow switches
- Built in drains
- Slim line design
- Ozone friendly & highly efficient R410a refrigerant

C SERIES

The C series is the top of the line range of heat pumps offered by Sunlover and Oasis.

This supreme unit has an automatic reverse cycle defrost system which allows the unit to operate in temperatures below 0°C. At approximately 10°C, all heat pumps will start to ice up. If the unit is not fitted with a reverse cycle function it will stop operating.

At low ambient air temperatures the OASIS C series will inject warm refrigerant through the coils allowing the ice to melt and the unit will keep operating.

We use ozone friendly and highly efficient R410A refrigerant to ensure optimum performance. Our units are fitted with a world class digital controller to drive the entire system & are reliable and of the highest quality.

The C series units are able to water sample and also have a time clock function to make sure running costs are kept to a minimum.

COMMERCIAL

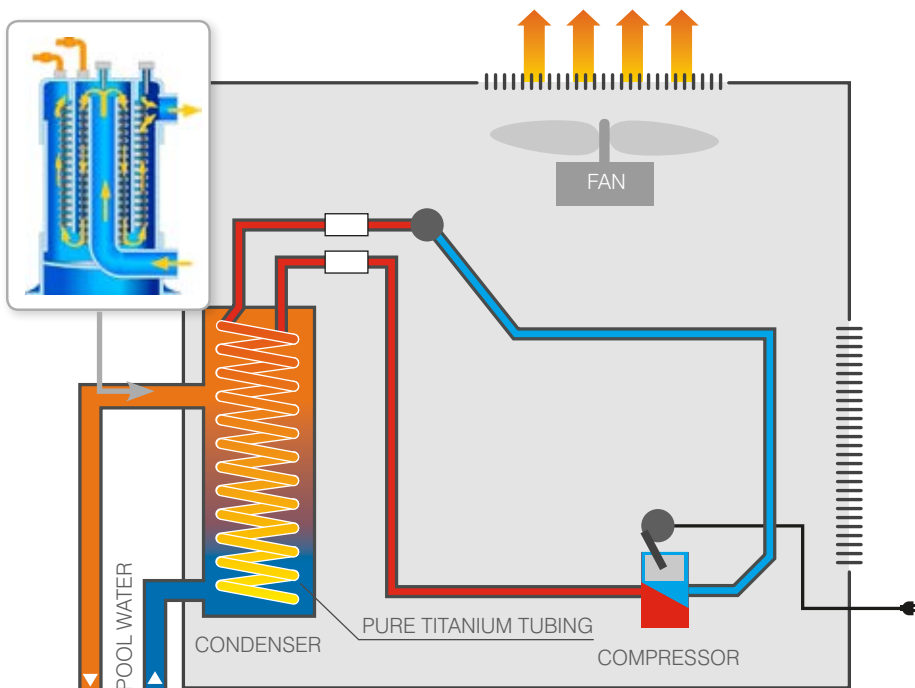

The OASIS Commercial Range of heat pumps is the most efficient and effective way to heat a commercial pool no matter what size. We have seven units up to 200 kw's and multiple units are regularly used in larger pools.

This range is extremely reliable and robust with the frame & external panels made from galvanized powder coated steel, with an upgrade option to stainless steel available.

The V shape designed condenser increases the space for air flow direction and makes defrosting easier. All models are designed to both heat and cool the pool water and come standard with built in automatic defrosting to ensure optimum performance at all times.

HOW HEAT PUMPS WORK

Note: This heat pump selection table is a guide only, as each application is different. Extended season means heating the pool 8 months of the year (September to April). Selection is based on a 500 micron pool cover being on for 16 hours a day with the heat pump operating between 6 am and 8 pm. Contact your Sunlover Heating agent for an independent evaluation of your pool heating requirements.

Each and every OASIS Heat Pump is factory tested prior to final packaging & have CE & C Tick approval.

The OASIS units are also covered by Australia Wide service support.
