OASIS URBAN i-SPA 9 INVERTER HEAT PUMP

- ✓ ENERGY SAVINGS OF UP TO 30% WITH INVERTER TECHNOLOGY
- ✓ SUITABLE FOR SPAS UP TO 5500 LITRES
- ✓ SUPER QUIET OPERATION
- ✓ CONTEMPORARY MODERN DESIGN
- ✓ PATENTED AIRFLOW
- ✓ FRIENDLY AND RELIABLE BACK UP SERVICE

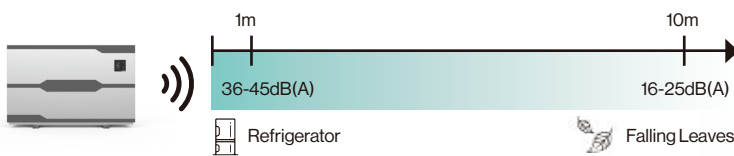

INVERTER TECHNOLOGY

The Oasis Urban i-Spa 9 Inverter Heat Pump reduces energy use through it's variable speed function.

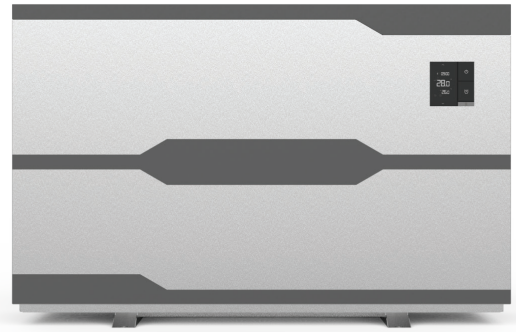

Where a standard Heat Pump only has 1 speed, meaning it will always draw power at its maximum rate, an Oasis Inverter Heat Pump can dial it's power consumption up or down based on the heat demand requirements of your spa. As your spa approaches it's desired temperature your Oasis Inverter Heat Pump begins to taper its power consumption, resulting in lower running costs.

✓ **LOW NOISE**

The Urban i-Spa 9 is super quiet due to inverter technology and it's silent mode setting

Contemporary Modern Design

✓ **DOUBLE-SIDE AIR FLOW OUTLET**

The Urban i-Spa 9 uses a patent double-side airflow cabinet which through years of application in the market is proven to be highly efficient in heat exchange, outstandingly silent during operation and allows for installation in tighter spaces

✓ **MATT-FINISHED CONTEMPORARY CABINET**

The cabinet is highly weather resistant and blends well into urban environments

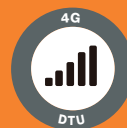

✓ **MODERN CONTROLLER**

The smart touchscreen controller is easy to use, provides great diagnostics and features a 32-bit processor for fast and smooth operation

APP CONTROL SIMPLIFY YOUR LIFE WITH AQUA TEMP.

Via connection by Bluetooth, Wi-Fi and 4G, you can take control of your pool heat pump from anywhere in your home on your smartphone.
